Description:

The Message of the Qur'an by Muhammad Asad, dedicated to "people who think", serves as a matchless aid to understanding the Holy Book of Islam and provides in itself a complete education in the faith. As the distinguished British Muslim, Hasan Gai Eaton, explains in a new Prologue to the work, there exists no more useful guide to the Qur'an in the English language than Muhammad Asad's translation and commentary, and no

other translator has come so close to conveying the meaning of the Qur'an to those who may not be able to read the Arabic text or the classical commentaries. Muhammad Asad's obituary in the Independent praised his magnum opus, The Message of the Qur'an as a work without rival in English as an interpretation of the Holy Book, not only in its "intellectual engagement with the text", but also in its "intimate, subtle and profound understanding of the pure classical Arabic of the Qur'an". This new edition makes the work even more accessible by introducing: 1. A complete Romanized transliteration of the Arabic text. 2. A supporting guide to pronunciation. 3. A newly compiled general index of names and key concepts. 4. Original artwork by the internationally renowned Muslim artist and scholar, Dr. Ahmed Mustafa. The unique value of Muhammad Asad's lifelong labor in bringing to light the teachings of the Qur'an is becoming widely and deservedly recognized at a time of growing worldwide interest in what the universal message of Islam has to offer mankind.

Muhammad Asad, to my knowledge, is the only person to have translated the Quran into English having learned to speak Arabic in a dialect closest to that which the Prophet Muhammad (may peace be upon him) spoke (and the Arabic in which the Quran is written). Although all of the other translators indeed spoke and read Arabic, their understanding was at best wooden and purely academic, rather than a living understanding. Asad lived for years among the Bedouin of the Arabian Peninsula in Central and Eastern Arabia, and although even their language is not precisely the same as the Prophets (PBUH), it is the closest in existence today. Furthermore, Asad's commentary is perhaps the most nonsectarian of any Quran I have read. It has somehow managed to escape the long arm of the Saudi Arabian Wahhabist publishing houses (which take all scholarly and wonderful English translations of the Quran and edit them to reflect their extremely narrow and extreme views). Unfortunately, the Wahhabist publications have dominated the English speaking world for so long that many Westerners have difficulty accessing the truly universal nature of Islam through the Quran. Asad's commentary, while not being as in depth as, say, the commentary in the Maulana Muhammad Ali's translation (which is still deserving of much respect), I find Asad's commentary to be free of some of the more sectarian understandings. For this reason, perhaps, this Quran can be difficult to find. Indeed, Asad admits at the outset, that his goal is to present the Quran as if it were first heard to the first Muslims, before we humans built up complex and complicated legal and institutional structures around what was intended to be a simplification and purification of such overcomplications of the Jews and Christians. I find this translation and commentary, while not perfect, to be the one I trust and refer to the most. If I had the opportunity to own only one Quran, it would be this one.
